BONUS REPORT INCLUDED!

The 10 Apple Accessory Rip-Offs

- 1) Overpriced charging cables that fray fast
Rule: choose certified, reinforced cables built for daily bending.
- 2) Single-purpose dongles that multiply costs
Rule: use one quality multi-port hub instead of 3–5 adapters.
- 3) Premium watch bands priced like jewelry
Rule: judge by materials + clasp quality, not branding.
- 4) Minimalist cases that don't protect
Rule: protection first—screen repairs cost more than good cases.
- 5) Low-capacity storage that becomes obsolete
Rule: buy for the next 2 years, not today's minimum.
- 6) Non-certified chargers that harm battery health
Rule: certification protects charging stability.
- 7) Overpriced stands/mounts with limited adjustability
Rule: function beats aesthetics for daily desk use.
- 8) Redundant chargers for every device
Rule: one strong multi-device charger reduces clutter and cost.
- 9) Elegant keyboards/mice that sacrifice ergonomics
Rule: comfort and productivity beat "matching your Mac".
- 10) Buying without comparing authorized retailers
Rule: retailers often discount, bundle, or offer better returns.

The Apple Smart-Buyer Checklist

- ✓ Certified accessories only
- ✓ Multi-purpose over single-use
- ✓ Durability over branding
- ✓ Future-proof capacity
- ✓ Ergonomic comfort
- ✓ Retailer comparison
- ✓ Clear return policy

Why this bonus is included:

It complements both main reports by protecting your budget and reducing regret purchases.
